

China RoHS 2 Certificate of Compliance Directive GB/T 26572-2011 Restriction of Hazardous Substances

Bay Motor Products, Inc. hereby declares and certifies that our products are compliant to China RoHS II Directive (GB/T 26572-2011) and the definitions given for the Directive GB/T 26572-2011, by the commission on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

Bay Motor Products, Inc. further states, our products are RoHS compliant to the latest directive SJ/T 11363-2014. This directive establishes the marking requirements for Toxic and Hazardous Substances in Electronic Information Product of the People's Republic of China, in accordance with the definitions there in, and of the Management Methods for Controlling Pollution Caused by Electronic Information Industry, order no. 39. (shown below); and that there are no RoHS exemptions.

Based on certifications received from our supply sources, Bay Motor Products, Inc. hereby states that following banned substances are not found above the threshold level listed other than exceptions approved by (MIIT) Chinese Ministry of Industry and Information Technology.

Lead (Pb)	0.1 %
Cadmium (Cd)	0.01 %
Mercury (Hg)	0.1 %
Hexavalent Chromium (Cr+6)	0.1 %
Polybrominated Biphenyls (PBB)	0.1 %
Polybrominated Biphenyl Ethers (PBDE)	0.1 %

China RoHS Marking:

China RoHS 2 requires that all electronic and electrical products that are sold in the People's Republic of China be marked with one of the following two logos depending on whether if they contain any hazardous substances exceeding official concentration limits.

- Green symbol with "e" in it: This product does not contain any hazardous substances exceeding concentration limits and is a green environmentally friendly product which can be recycled;
- Orange symbol with a number in it: This product contains certain hazardous substances and can be used safely during its **environmental protection use period** (as indicated by the number in the center) which should enter into the recycling system after its environmental protection use period.

If a product contains certain hazardous substances exceeding concentration limits, its environmental protection use period ((unit in years (a)) must be determined and marked. **The date of manufacture shall also be indicated.** In addition to that, manufacturers and importers shall provide the names and contents of hazardous substances in **product instructions** (not on marked on product itself) and mark them on the parts where they are contained by using the table below:

Part Name	Hazardous Substances					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr (VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)

It shall be noted that above markings are only required for finished electrical and electronic products. Suppliers of materials and parts that are used to manufacture electronic and electrical products do not need to mark their products. However, they need to provide necessary information to their downstream users to help them determine the final China RoHS markings.

SJ/T 11364-2014 specifies detailed marking requirements for hazardous substances in electronic and electrical products, the environmental protection use period and recyclability.

The information supplied in this letter is solely intended for use in health, safety and environmental regulatory affairs. It is not intended for use by individuals or companies in any other means without the direct written permission of Bay Motor Products, Inc.

Bay Motor Products, Inc. will continue to monitor our purchased products from our suppliers for China RoHS compliance and will comply with any applicable requirements as needed.
