

Environmental Certificate of Compliance
Battery Directive (EU) 2006/66/EC
Packaging and Packaging Waste Directive (EU) 94/62/EC

Bay Motor Products, Inc hereby declares and certifies we are compliant to both; Battery Directive (Directive 2006/66/EU), along with the Packaging and Packaging Waste (Directive 94/62/EC).

In September 2006, the European Union's Directive 2006/66/EC (Battery Directive) came into force with an aim to prohibit the sale of batteries and accumulators containing hazardous substances and to set rules and promote collection, treatment, recycling and disposal of waste batteries and accumulators. This directive applies to spent batteries collected together with WEEE and requires their removal and separate collection. Once removed from WEEE, spent batteries are governed by the Battery Directive. Bay Motor Products, Inc. uses lithium batteries in its inspection equipment and our responsibility under the Battery Directive is taken care of under our WEEE Take-Back program.

On December 20, 1994 the European Parliament and Council Directive 94/62/EC on packaging and packaging waste requires the marking of packaging with an appropriate recycle category, the recycling of packaging waste, and require brand owners and importers of packaging to ensure that the amount of heavy metals which can be released to impact on the environment be limited in all packaging components to 100 ppm max by weight from 30/06/01 (this is the combined total for cadmium, mercury, lead and hexavalent chromium). Bay Motor Products, Inc., packaging materials fully meet these requirements.

Bay Motor Products, Inc further states, is committed to manufacturing environmentally safe products for the community, and will make reasonable efforts and required adjustments to its practices, if necessary, to comply with various environmental directives and industry initiatives on the elimination of hazardous substances, labeling, marking, certification and registration as required in markets where we sell our products..

The information supplied in this letter is solely intended for use in health, safety and environmental regulatory affairs. It is not intended for use by individuals or companies in any other means without the direct written permission of Bay Motor Products, Inc.

Bay Motor Products, Inc. will continue to monitor the usage and proper disposal of waste batteries and will comply with any applicable requirements as needed.
