

DRC Conflict - Free Compliance Statement

Reference: Dodd-Frank Wall Street Reform and Consumer Protection Act, Section 1502, reporting requirements for conflict minerals.

Conflict minerals are Columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives; or any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the Democratic Republic of the Congo (DRC) or an adjoining country. Metals derived from these minerals are tin, tantalum, tungsten, and gold.

I certify that our products are DRC Conflict-Free. Manufactured without tantalum, tin nor gold material.

Bay Motor Products takes very seriously the worldwide concerns that metals mined in the conflict areas of the Democratic Republic of the Congo (DRC) may be making their way into the electronics supply chain. Bay Motor Products complies with the expectations in the EICC program by surveying its supply chain partners to gather smelter names, using EICC Conflict Free Smelters only and certify in writing they do not knowingly procure gold, tantalum, tungsten or tin, from conflict areas of the DRC, for use in semiconductor products it produces or sells. Based on this, Bay Motor Products confirms that any of the aforementioned metals utilized by our supply chain and contained in our products are not derived from, or sourced from mines in the conflict areas of the Democratic Republic of the Congo (DRC), and are "DRC Conflict-Free".

The information supplied in this letter is solely intended for use to represent we comply all U.S. Federal regulatory laws and requirements. It is not intended for use by individuals or companies in any other means without the direct written permission of Bay Motor Products, Inc.
